

Who lives on this planet?  
Write down what they look like.

This planet has three moons.  
How is life different on these moons?

This black hole leads to another  
dimension! What is on the other side?

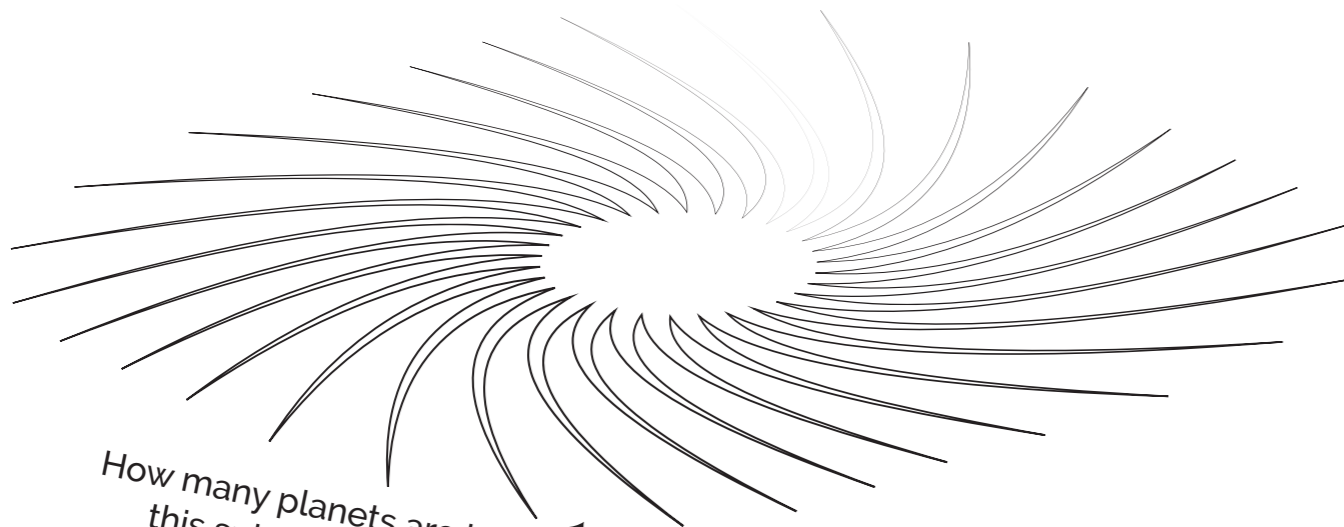

# CREATE YOUR OWN UNIVERSE

Astronomers have looked into the night sky and used their imaginations to name planets, stars and comets for thousands of years. Now you can do the same!

Write about these strange worlds -  
what will you discover on these new planets?

How many planets are in  
this spiral galaxy?

Give your comet a name.  
How often does it pass Earth?
